

## What is Zoom?

Zoom is a video and web conferencing tool that BYU-I students and employees can use to hold classes and meetings. Within the virtual room, you can see and hear other attendants with a video call display, you can share your desktop screen with those in your meetings, and you can record your Zoom meeting for those who were unable to attend.

According to the Brigham Young University-Idaho's license for Zoom, all students and employees have unlimited access to Zoom while affiliated with the institution. The Zoom account may be used for job-related, academic, or personal use.

There are many more elements and features that Zoom has to offer. To learn more about Zoom and how you can use it, take a look at the following articles:
